
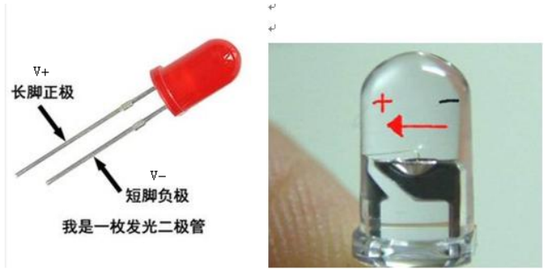
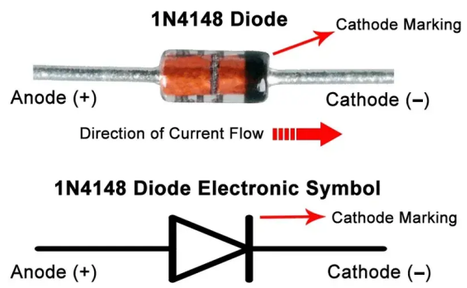
2SC1815 Pinout

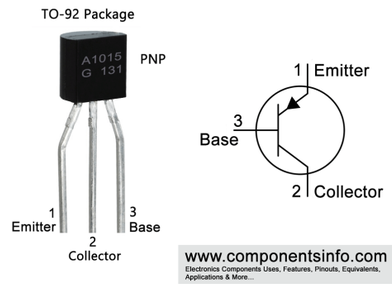
[Option]NPN transistor detects 75R signal return.



1N4148 Diode Pinout



A1015 Transistor Pinout



PNP transistor detects PCM 5V dropping to 4V for IMRC work signal.

ZK-SJ4 FP5139 CC/CV power module is 12.0V and 1.5A to work.
(PlanB)LM2596 CC/CV step-down module is 11.4V/1.5A to work.

IMRC motor is stalled and kept in 1.5A static current of 12V power.
